

# Advanced Blended learning Competencies and Didactics

**Città della Pieve  
Umbria  
4th - 8th May 2009**

The course aims at developing competencies in special didactics of blended learning and enables the participants to develop and realise training courses with a blended learning approach. The course not only transmits technical know-how, but above all skills in instructional design. The course itself is developed as a blended learning concept in order to establish the immediate experience with the methodology.

**Education and Training**

This course is on the Grundtvig 3 database : DE-2008-781-003  
Deadline for applications for G3 funding : 16th January 2009
